PROFESSIONAL PROFILE

Systems and infrastructure engineer with 12+ years of experience across university IT operations, network administration, Linux/Windows environments, virtualization, cybersecurity, and technical education. Built segmented Proxmox laboratories, deployed defensive security tooling, automated Ubuntu provisioning with Terraform, and developed satellite-connected IoT architectures. Combines hands-on troubleshooting, documentation, technical leadership, and cross-functional communication. Experience delivering technical instruction to 1,000+ students and training 100+ faculty/staff (cumulative figures).

TECHNICAL COMPETENCIES

Systems & Networks: Linux, Windows Server, Active Directory/GPO lab, TCP/IP, VLANs, switching, routing, DNS/DHCP, VPN/Tailscale/Twingate, Wireshark, hardware and rack infrastructure

Security & Platforms: Wazuh, Security Onion, Velociraptor, MISP, FIM, log analysis, Proxmox VE, Docker/Compose, Raspberry Pi, Nmap, MITRE ATT&CK fundamentals

Automation & Telemetry: Terraform, cloud-init, QEMU Guest Agent, Git, Bash/PowerShell, Ubuntu Server, ESP32-C6, Starlink, edge/IoT architecture, Grafana concepts

PROFESSIONAL EXPERIENCE

Engineering Professor — Computer Systems / Industrial Engineering | Tecnológico Nacional de México, Campus Altamira (altamira.tecnm.mx) | Aug 2012 – Sep 2026

- Taught and mentored 1,000+ engineering students across networking, systems, programming, cybersecurity, and related courses; designed reproducible Linux, Windows, and network labs.
- Delivered technical training to 100+ faculty/staff cumulatively; prepared hands-on materials, operating procedures, and troubleshooting guides.
- Designed and supported lab environments using Proxmox, managed switching, VLANs, system monitoring, and defensive security platforms.

Head of IT Center | Tecnológico Nacional de México, Campus Altamira | 2023 – 2024

- Managed institutional IT infrastructure, network services, endpoint support, preventive maintenance, and incident escalation; coordinated vendors and service restoration.

Lead Faculty Advisor & Technical Project Mentor — TerraTech | Campus Altamira | Apr – Sep 2026

- Mentored a multidisciplinary team developing agricultural telemetry architecture with Starlink, Wi-Fi, ESP32 sensor nodes, Raspberry Pi edge services, and environmental monitoring.
- Won 1st place in the Agro-Industrial category at the university-level INNOVA TEC 2026 competition (Campus Altamira), advancing to the regional stage.

Cybersecurity Essentials Workshop Instructor | Instituto Tecnológico de Ciudad Madero | Jan 19–23, 2026

- Designed and delivered a 30-hour, five-day practical workshop for faculty/university personnel on monitoring, Linux/Windows logs, vulnerability assessment, phishing, incident response, Wazuh, Security Onion, Wireshark, and Nmap.

Head of Academic Department — Computer Systems / Industrial Engineering | Campus Altamira | 2014 – 2016

- Led academic operations, faculty coordination, engineering schedules, documentation, and cross-functional issue resolution.

Level 3 Support Engineer | suempresa.com | Sep 2010 – Feb 2011

- Monitored web/DNS services, investigated escalated incidents, and coordinated restoration with technical teams and vendors.

SELECTED ENGINEERING PROJECTS

Security Operations Laboratory | Operational lab | 2026

- Deployed Wazuh, Security Onion, Velociraptor, and MISP in a virtualized environment; validated Wazuh real-time file integrity monitoring and documented a Rule 550 integrity-change alert with before/after hashes.

Segmented Homelab Infrastructure | Operational lab | 2026

- Architected Proxmox-based workloads across seven logical VLAN segments; configured managed networking, DNS services, remote access, and lab isolation.

Automated VM Provisioning | Validated implementation | 2026

- Used Terraform modules and an Ubuntu 24.04 cloud-init template to provision two Proxmox VMs; verified network access, SSH, cloud-init, and QEMU Guest Agent.

Aegis Control — Aegis Shield Blue Team Services | Founder & Technical Lead | 2026 – Present

- Developing an early-stage defensive automation venture; deployed an Ubuntu/Docker controller and worker, initialized OpenClaw gateway and Telegram connection, and validated worker API health. No commercial SOC outcomes claimed.

TerraTech — Satellite & IoT Telemetry | Architecture and development | 2026

- Designed sensor-to-dashboard concept with ESP32-C6 environmental telemetry, local Wi-Fi, Raspberry Pi edge gateway, Starlink backhaul, and Grafana-based monitoring; implementation stages distinguished from verified deployment.

CERTIFICATIONS

Blue Team Level 1 (BTL1), 2025 | Google Cybersecurity Certificate, 2023 | Google IT Support Professional Certificate, 2019 | Junior Penetration Tester Learning Path (60 h), 2022

EDUCATION

Bachelor of Engineering, Computer Systems Engineering — Tecnológico Nacional de México, Campus Ciudad Madero (2003–2008) | cdmadero.tecnm.mx

Diploma in Information and Communication Technologies (master's-level studies) — Universidad Interamericana para el Desarrollo, UNID (2010–2012) | www.unid.edu.mx

Diploma in Telecommunications — Universidad del Noreste, UNE (2015) | www.une.edu.mx

ADDITIONAL

Publications: Contributor, logistics routing methodology (2020) and fuzzy-logic 3D bin-packing study (2019). | Languages: English and Spanish (native/bilingual); German (A2); Mandarin (basic).
